Rudolf Steiner education

18th November 1985

## TO WHOM IT MAY CONCERN

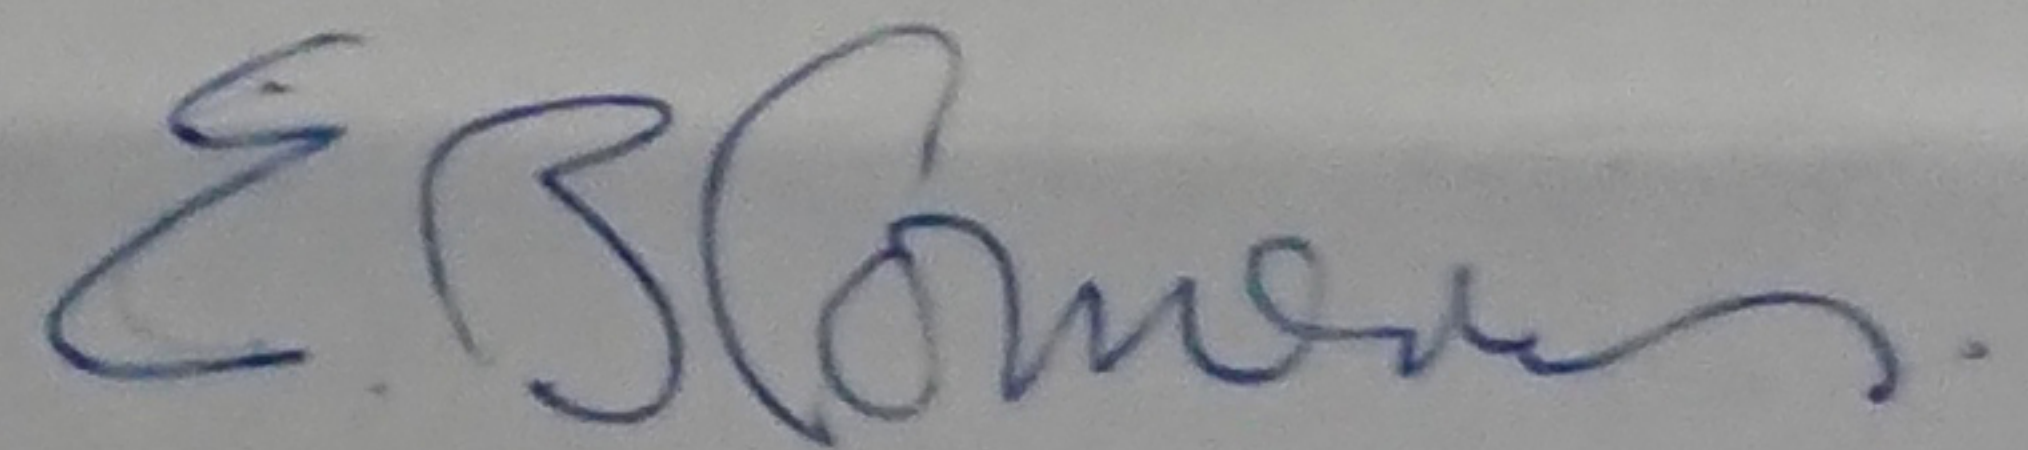

HANS-ERIK PETERMANN has been employed by this school as a full-time teacher of German and Business Economics during 1985.

He is qualified to teach the above subjects by virtue of his B.A. (Hons.) degree and Higher Diploma of Education and also by having successfully completed a special course in the theory and practice of Anthroposophical Education.

We are a private school who follow the Joint Matriculation Board's syllabus, but our methodology differs completely from that of other, non-anthroposophical schools. As such, our teachers need to be qualified beyond that which is required in other schools.

As we are the only high school implementing this type of education in the Cape, we would find it difficult to replace Mr. Petermann at short notice. Whereas there are German teachers available, there are none available who have had training in Anthroposophical Education.

We, therefore, request that Mr. Petermann be granted a work permit to enable him to continue to teach at our school during the course of next year, 1986.
